Center for Human Services

Building a stronger community…one family at a time.

The WISe Program

A youth centered support program under our Community Based Intensive Services Department

What is the WISe program?

WISe *(Wraparound with Intensive Services)* program supports youth (up to age 20) with complex behavioral health needs who are eligible for Apple Health / Medicaid coverage and meet medical necessity criteria for WISe services.

What makes it so unique?

A youth's WISe team is made up of a team of professionals and other people who support them that THEY choose (friends, family, neighbors, teachers, etc.) …

The WISe team helps empower the youth's agency and choice, while providing comprehensive behavioral health services and support.

What do these services look like?

A Team Facilitator/Coach will guide the youth and their family through the process. 24/7 Crisis support services are provided, as well as behavioral health medication prescribing if needed. These services are provided at the location and time of the client's choosing, such as their homes, schools, clinics, etc...

For LGBTQIA+ Youth:

We are proud to offer the ability for youth to have a team with professionals from the LGBTQIA+ community. Contact Centralized Screening for more information!
