Flood Safety

When a flood threatens

Keep informed. Pay attention to safety messages from official sources such as the National Weather Services and local government.

Move to higher ground

Don't camp in flood prone areas!

Get out of areas subject to flooding. This includes dips, low spots, floodplains, riverbanks, etc.

Stay out of areas with lots of trees during wind and heavy rain or high water.

Don't be caught off guard if water levels rise overnight.

It doesn't have to rain directly over you for there to be flooding.

Floods can happen any time of the year, but flooding season in Snohomish County typically begins in October and lasts into spring.

During a flood

Obey evacuation orders.

Avoid areas subject to sudden flooding.

Do not walk, swim or drive through flood waters. Turn Around, Don't Drown!

Remember, just six inches of moving water can knock you down, and one foot of moving water can sweep your vehicle away.

Stay Out of Flooded Areas

If you notice even a slight rise in water level, seek higher ground immediately!

Don't walk through flood waters. If you are trapped by moving water, move to the highest possible point and call 911 if possible. Water may be deeper than it appears and can hide hazards such as sharp objects, washed out road surfaces, electrical wires, chemicals, etc.
